The Sharp PC-1500 is an 8-bit pocket computer introduced in 1981 in Japan and in 1982 worldwide. It is capable of running programs written in BASIC or in LH-5801 machine language. The TRS-80 PC-2 (Radio Shack) is the same machine with a different layout. The Sharp PC-1500A is the same machine with more RAM.

[How to transfer programs to/from a PC using the tape interface.](#)
